Postmaster: Send address changes to *Journal of Public Health Management and Practice*, P.O. Box 1550, Hagerstown, MD 21740.

Purpose of journal: *JPHMP* is a PEER-REVIEWED journal with a mission to provide practice-based information applicable to the design and implementation of public health programs.

Information for authors: Readers interested in submitting articles for possible publication should send articles and disks with a current c.v. to Lloyd F. Novick, MD, MPH, 1127 Wagonwheel Drive, Skaneateles, NY 13152. Please request a current author guide from Dr. Novick at novick@adelphia.net. High-resolution, camera-ready images may be submitted electronically as either a Tagged Image File Format (TIFF) or an encapsulated PostScript (EPS) file in Adobe Illustrator®, Adobe Photoshop®, or QuarkXPress®. Please save files in both the application in which they were created (i.e., Adobe Illustrator®) and as either EPS or TIFF files. Use computer-generated lettering. Do not use screens, color, shading, or fine line. We cannot accept art that has been photocopied, is embedded in a Word document (has a .doc extension), was downloaded from the Internet, is supplied in JPEG or GIF formats, or was created in PageMaker or PowerPoint. A laser proof must accompany art that is being submitted electronically.

Indexing: *JPHMP* is indexed in *Manual Alternative & Natural Therapy Index System*, *Cumulative Index to Nursing and Allied Health Literature (CINAHL)*, *HealthSTAR (Health Services, Technology, Administration, and Research)*, *MEDLINE (searchable through PubMed)*, and *MEDLARS*.

Multimedia reprints: *Journal of Public Health Management and Practice* is now available in microform and electronic formats from ProQuest Information and Learning. Contact ProQuest Information and Learning at (800) 521-0600 for further information and pricing on microform and electronic products. For photocopies of 100 or fewer, contact www.ingenta.com or their helpdesk at ushelp@ingenta.com or by phone at (800) 296-2221 (within the U.S.) and for those outside the U.S., please call +1-617-395-4046. For all U.K. customers, please use help@ingenta.com or call +44 (0) 1-225-361110.

EDITORIAL

Integrating Child Health Information Systems S1

Alan R. Hinman, Kristin N. Saarlax, and Michele A. Lloyd-Puryear

All Kids Count 1991–2004: Developing Information Systems to Improve Child Health and the Delivery of Immunizations and Preventive Services S3

Kristin N. Saarlax, Alan R. Hinman, David A. Ross, William C. Watson, Jr, Ellen L. Wild, Terry M. Hastings, and Patricia A. Richmond

- This article describes the lessons learned from this 13-year program that are applicable to other public health and medical care initiatives.

Evolution of a Child Health Profile Initiative S16

Deborah S. Linzer, Michele A. Lloyd-Puryear, Marie Mann, and Michael D. Kogan

- This article details a qualitative assessment of state programs that were funded to develop plans for the integration of newborn screening and genetic services systems with other maternal and child health systems.

Family Perspectives on Integrated Child Health Information Systems S24

Terry Marie Hastings

- In this article, interviews with parents, including those who have children with special needs, are assessed and common themes are discussed.

Integration of Child Health Information Systems: Current State and Local Health Department Efforts S30

S. Nicole Fehrenbach, Janet C.R. Kelly, and Christie Vu

- Eighteen health departments were interviewed in an exploratory research study, described in this article, to gather information on their current activities regarding integrating child health information systems.

Key Elements for Successful Integrated Health Information Systems: Lessons From the States S36

Ellen L. Wild, Terry M. Hastings, Ruth Gubernick, David A. Ross, and S. Nicole Fehrenbach

- This article describes the key elements that are considered critical to the success of an information systems integration project, their best practices as implemented by states, and the lessons learned from site visits.

Assessing Organizational Readiness and Capacity for Developing an Integrated Child Health Information System S48

Ellen L. Wild and S. Nicole Fehrenbach

- The Tool for Assessment and Planning, which assists public health teams in designing child health information integration projects by assessing their organizational readiness and capacity, is presented in this article.

Principles and Core Functions of Integrated Child Health Information Systems S52

Alan R. Hinman, Delton Atkinson, Tonya Norvell Diehn, John Eichwald, Jennifer Heberer, Therese Hoyle, Pam King, Robert E. Kossack, Donna C. Williams, and Amy Zimmerman

- This articles discusses a set of 19 principles, 22 core functions, and 8 desirable functions for integrated child health information systems that were proposed for 4 program areas: newborn dried blood-spot screening, early hearing detection and intervention, immunizations, and vital registration.

Perspectives on Integrating Child Health Information Systems: Parents, Providers, and Public Health S57

Scott D. Williams and William Hollinshead

- This articles describes how a successful integrated child health information system will require a strong commitment from these 3 stakeholder groups and attention to human values as well as technical challenges.

All Kids Count Connections: A Community of Practice on Integrating Child Health Information Systems S61

Ellen L. Wild, Patricia A. Richmond, Louis de Merode, and John D. Smith

- This article describes the All Kids Count community of practice called Connections and how it brings together 11 state and local public health agencies to learn from each other, capture best practices, and collaboratively address challenges.

JPHMP is a benefit to active members of the National Association of County and City Health Officials (NACCHO). *JPHMP* is offered to NACCHO members at a reduced rate.

Assessing What Child Health Information Systems Should Be Integrated: The Michigan Experience S66

Therese Hoyle and Robert Swanson

- The project described in this article examined which child health data would be appropriate and useful to integrate with an existing real-time Michigan Department of Community Health application, such as the Michigan Childhood Immunization Registry.

Integrating the New York Citywide Immunization Registry and the Childhood Blood Lead Registry S72

Vikki Papadouka, Paul Schaeffer, Amy Metroka, Andrew Borthwick, Parisa Tehranifar, Jessica Leighton, Angel Aponte, Ruron Liao, Alexandra Ternier, Stephen Friedman, and Noam Arzt

- This article describes how a modular approach, called Master Child Index, was used to integrate the New York City Department of Health and Mental Hygiene's childhood immunization and the blood lead test registry databases.

The Indiana Network for Patient Care: An Integrated Clinical Information System Informed by Over Thirty Years of Experience S81

Paul G. Biondich and Shaun J. Grannis

- This article presents the Indiana Network for Patient Care, an integrated citywide medical record system that promotes health quality by enabling efficient access to clinical information.

A Convocation of Wizards: Synergies at the Intersection of Child Health Care, Public Health, and Information Technology S87

Richard N. Shiffman

- This article describes a vision of health care with obstacles removed: experts should work to diminish the insularity that interferes with effective collaboration, focus on the intersection of child health, public health and information technology, and recognize and promulgate the message that one-size technology solutions that are designed for adult medicine don't fit this area of practice.

A Vision for Child Health Information Systems: Developing Child Health Information Systems to Meet Medical Care and Public Health Needs S91

Alan R. Hinman, Kristin N. Saarlal, and David A. Ross

- This article describes the common themes that were the recommended results of the December 2003 All Kids Count conference, "Developing Child Health Information Systems to Meet Medical Care and Public Health Needs."

The Near-Term Future for Child Health Information Systems S99

David A. Ross, Alan R. Hinman, Kristin N. Saarlal, Michele A. Lloyd-Puryear, and Stephen J. Downs

- This article describes how the effectiveness of future information infrastructure should be judged by the degree it informs parents about the social context harmful to their children, guides communities to take actions that prevent disease and promote healthy lifestyles, and supports private and public health care providers through complete and comprehensive longitudinal information of every child.
